Game Concept Ideas

Vi - No idea about a name

- Graphics quality similar to Dumb Ways to Die but in 3D and a bit cuter
- Different characters for the users to choose from, based on mythological characters (e.g. fae, vampire, blah blah blah)
- Premise takes the original idea of university, but makes it more of a fantasy academy/college/university. Hogwarts vibes
- Would like to take inspiration from the old pottermore (if anyone remembers it), where players would do simple and small activities like brewing potions, collecting items.
- Would like to invoke the feeling of old online games from this era.
- Not a super serious plot/theme.
- Vibes should be very chill/casual. Something similar to pokopia.
- Different maps as different parts of the university.
- (expansion or concept idea) would be for players to be put into teams or something so that there's a multiplayer aspect but not really (kinda like a scoreboard thing) which helps keep it competitive and for users to keep coming back and playing.
- Maybe the user could play through "chapters" or different "story arcs", which allows for the game to continuously update and give players a fresh experience. Could also be a continuous story as well.
- Students can continue to age/progress in updates.
- Activities would be puzzle based of course.

Saaketh -

- Sort of like a stardew type vibe where character runs around uni solving problems and doing tasks (where different puzzle mechanics will be integrated into) to keep the campus running.
- Sort of a chill, lowkey vibe, pickup putdown, casual.
- Art style - simple low poly with nice relaxing music

Miki - Essentially either a chill no rush game where u have a few rooms with different puzzle ideas(like inspired by each member), doesn't have to be overly complicated, we could add a time based mode/randomizer. We can theme the rooms to follow a fantasy based school concept.

-Trapped in a uni building(i.e Finkel) and need to escape by solving puzzles in the room based off different degrees like in the engineering room design certain pieces to fit into a lock to escape, another to connect a circuit, then a simple code solver to entice cs students,stuff like that?

Nick:

- Top down puzzle game, similar to the perspective of Animal Crossing / Link's Awakening, however 3D and low(er) poly
- Player runs through orthogonally arranged mazes stylised to a "backrooms / university" concept
- interactables will change / shift the layout of the maze / objective opens up to complete the level and "escape the room"
- Also relies on a sense of memory to visually map out the maze to complete the objectives

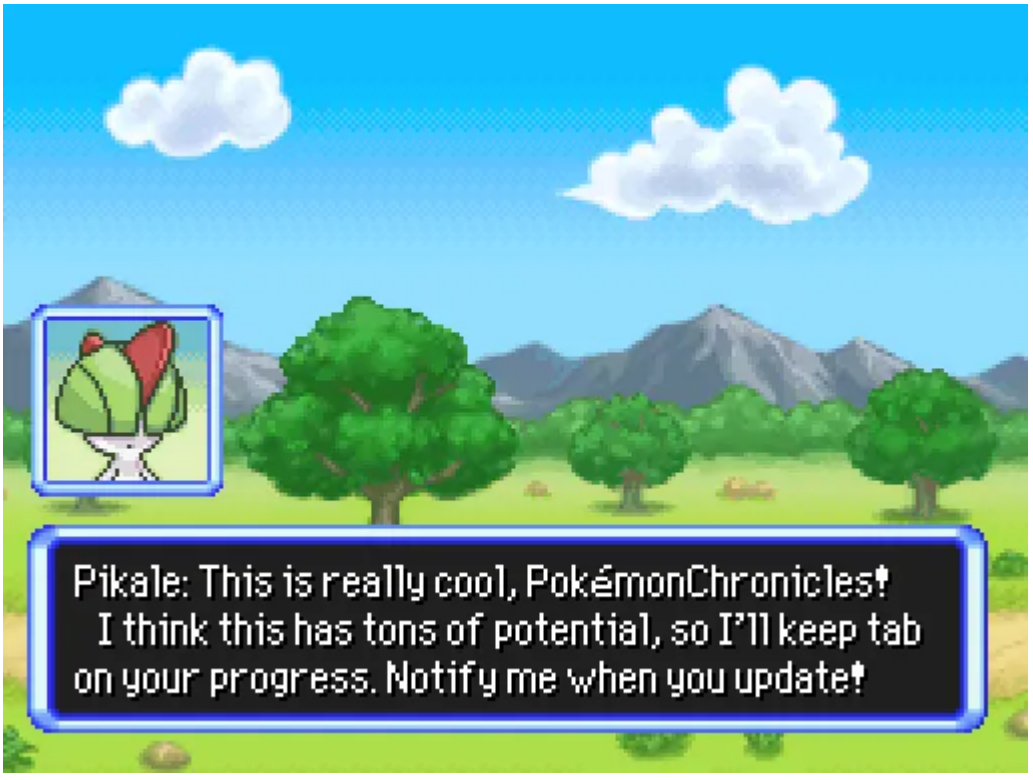
Brian:

- A game with basic uni run background - student need to head to class within the time limit, while the game loop is not actually time pressured, but different events(levels) penalize/award time
- The map is basically regarding the map of Monash Uni
- The outer layer of the game happens in this map, with student current location and destination showing in real time
- The student could make route decisions, and drawn into various types of events, for example
    - Students could aim for a challenging shortcut (add an challenge goal/a harder level), when they failed, they are penalized extra time than normal route
    - Random events that could help completing the level, or rewarding in long run (-10s now but reward 5s for every subsequent level completed)
    - Levels could be basically anything, levels like subway surfers/sand of time to get across obstacles in shortcuts.
    - Maze level where you need to travel through stored stuff in the warehouse
    - Minesweeper?
    - Sokoban?
    - To be added

Game Art Style

Vi

- Simple, roundish art style (not too complex)
- Cute and aesthetic (not anime based tho, hmm maybe chibi ish)
- Hogwarts but in Pokopia lowkey
- Third person
- 3D
- Uses text boxes like in Genshin/Pokopia
- Maybe the game play (not art style) like open world aspects could be reminiscent of earlier Pokemon games
- Darker tones maybe? Suits the fantasy/dark academia thing more
- Chibi artsyle?



Miki

- Low poly style
- Use first person perspective to skip main character
- Use basic free assets like the dummy but build up the personality through dialogue
- Blocky characters?

-

-

Saaketh

- Very low poly, but in a charming way
- Simple, easy to put together
- Light colours - depends on vibe
- Doesn't take itself too seriously

Nick:

- Lower poly 3D models with more detail for 2D sprites (when seen in textbox)
- 2.5D scene
- Chibi (big head) with small body (similar movement speed to animal crossing sprites)
- Very similar to animal crossing (in terms of chibi)
- Able to rig entity skeletons so we only do one set
- Lower and closer camera angle (similar to Pokopia)

Brian

- 2.5d/2d (pokemon like)

Tile-grid
links awakening + pokopia

Puzzle Mechanics

Miki:

- Assumption we using a tile based grid system
- Puzzle ideas:
- While this can be altered to be spells, we could try making them as items as well
- U can temporarily compress a spell u have obtained into a rune and delay its effect as a throwable i.e wind or freeze
- Magical Imprints : For certain spells, as long as you have learnt them, you can leave like an echo of it on an item such that it can be left and then used in tandem with other objects to solve a puzzle, like a release trigger so all stored imprints release at once.
- A room of Mimicry- As u enter a room, there would be duplicates of you in a maze?? And in order to progress you have to find the right path to move such that u all meet in the middle and merge back together, no spells can be used as you are not a whole person.
- Deciphering a language to solve the puzzle, could be pictographs, like they had in unchartered 4 or smth like that
- A twist to rewind where instead of rewind the whole thing, u need to do it in segments or if pieces are out of alignment i.e bridge pieces
- Spell creating blocks
- Magnet grappling
- For a more school themed puzzle ideas:
- To explore the school's hidden secrets, you must learn more spells and obtain items which would help you solve them. This can be in simple terms of side questing like helping NPCS or doing school classes like Potion making(which could also contain puzzles to earn them).Scope can be an issue
- We can have fun riddles to hint where the wonders can be or what spells are required to solve the wonder.

Nick:

- Player can explore “open world” environment with (interactable) NPC characters
- Open world is limited to campus
- They can interact with puzzles through interactable elements and unique “spells”
- Tile-Grid system
- Player can enter “dungeons” and those are the puzzles
    - Dungeons contain interactables
    - Interactables change the environment
    - Spells can interact with interactables to change environment
    - Puzzles focused around movement being blocked / unreachable goal, of which interactables can make goal reachable / unblock it
- Level ideas:
    - Sewer level: cliche water levels rising / falling with buoys like platforms
    - Moving platforms with a grapple mechanic (like in Link Between world death mountain)
    - Hidden dungeons that only appear at night time

Brian:

- Tile grid interaction
- O'week?
- The player is attending orientation day and some random "friendly unimyth fanatic senpai" carries you around the school introducing facilities and eventually gets into various events

- Level ideas:
    - There exist a rumour that during the Orientation day, music room will be playing on its own, students are afraid and don't wanna get in that room during that room
    - Player and the senpai get into that room and couldn't get out, and there is music playing from that piano
    - Player finds out that the keys cannot be pressed
    - To fix that, you use magic items to shrink yourselves and get into the piano, replay the tune and solve the music (tune memorizing) puzzle
    - Tools:
        - Hammer to hit the string of the piano
        - Magic wand to shrink/magnify item/self (blocked from this level before getting that spell)
    - Logic:
        - Player needs to replay the rhythm by hitting the right pedal in sequence
-

Saaketh:

- Player explores around campus, runs into tasks/ different scenarios to do - with each task having its own mechanic.
- For example, a cafe is out of supplies and locked out of their storeroom. Here, we could have a player lockpick to get them out.
- Someone's admission letter gets drenched, you help them decipher from what's left to let them know where to go (decipher mechanic).
-

Vi:

- Maybe making potions (collecting ingredients - but you need to incorporate puzzles in order to get the ingredients
- Charm casting
- Quests where you need to figure out how to solve it (e.g. who to talk to, what potion to make, find the class)
- Maybe some puzzles in portraits
- Maybe a puzzle inspired by fireboy and water girl (e.g. the light one)
- Student drama, everyone's telling different stories and you need to piece together the truth

- If we go down the mythological creates route, maybe some puzzles specific to different kinds of mythological students (e.g. help the vampire who can’t see their reflection, or the gorgon who can’t see anything)

Game Name

LumenFall
LumenFall Academy

World Building

Three Gods that represent very fundamental concepts (e.g. creation, destruction, preservation or past, present, future or light, dark, tangible or ethos, pathos, logos, chronos)

Lumenfall (a light that has fallen)

Multiple provinces (named after planets, greek & roman gods) inside a Kingdom

- Inspired by different cultures

MC Ideas:

- A light that fell

“We who represent the convergence, uphold our duty to maintain balance.”

“We who represent the convergence, sustain creation, destruction and preservation”

Intro cutscene

- Student is tired, on their way home from uni
- Phone is getting notifications about uni, part-time job blah blah blah
- They get frustrated
- They swerve onto random road in the middle of nowhere
- They do something to their phone and scream maybe
- Lean back against the car
- Looking into the stars
- Star gets bigger and brighter, falls onto you
- Screen fades with the light,linking to how Nick introduced the presentation
- BOOM LUMENFALL
- 😀

boom player is transported to the middle of a forest

They’re confused and walk towards the academy (player controlled)

- This is where we introduce movement mechanics
- Maybe they get hungry and find an orange tree (it’s an apple)
- Confused
- Light is drawing you to the academy
- “Ok so there’s a light and it looks like it wants me to go in that direction. Isn’t this how people die in horror movies? Tbf it beats finishing my homework so what's the worst that could happen”
- Then you see the academy
- You try to enter the gates and they’re like
- “No stop trespassing”
- “Where’s your entrance letter?”
- “Uhhhhhhhh”
- *some poor guy off to the side conveniently loses grip of their letter and the wind literally blows it into the MC’s hand”

- “Man, why didn’t you show us the letter earlier? Enjoy the next few years!” *pushes mc through the gate
- “Head straight down, you’ll see the orientation section“
- *MC is internally grumbling about having to go from one school to another*
- “Like if you’re going to take me to a new world at least take me to one that has something cool”
- They meet someone handling orientation
- *magic*
- “You know what I take it back”
-
- *cue other student crying and banging the gate saying they had a letter*
-

Main scene ideas beyond intro

Either a cutscene which gives the player the overall background story of the world plus intro to magic / Throw the player straight in and as the game progresses, the player clues in the context

Possible linkup can be that this world specialises in magic and to keep honing and refining it, is puzzle solving, which can be in the form of helping people,forming bonds or quite literally solving puzzles to hone your imagination and spell usage.

As this is your first day, you have no classes and are encouraged to explore the campus and get familiar with your surroundings. The day will end once you have finished three/four essential spells / items(to be added) which indicate you have completed your orientation.

The player is allowed now to start exploring, npcs can be interacted with who have some dialogue but we can do a ask option which asks for any areas of interest to explore, they can at random select those which are important and we have not been.

As we head to one of the designated sections, we then start the designated friend portions of the game where the player will meet them in various different manners depending on their personality. They are also first years who are given the same tasks and will perform it with u(u do most of the solving however as they are native to this world, they give u the fundamental spell to solve the problem).

After gaining the necessary skills, u go to your dorm where in order to qualify entry, u must show u have learnt the basic and solves a few possible puzzles which require merging or chaining skills

Once done, set to u settling into your designated dorm and end of day and chapter 1.

Potential joke conversation bits

- MC curiously asks/ponders they have been here for a while and have not once thought to eat or drink and the NPC states what is eating or drinking, is it a type of magic??

Spell Set

Light/Dark based powers for first version (basic control of magic/teaches students to balance their own powers blah blah blah yin yang)

Magical light spectrum?

Light prism object which splits white light into the spectrum of available light options
Also have puzzles relating to non-visible light

Something to do with light + sound (sound travels slower than light)
Focused light (heat/fire)

Spell which allows us to interact with the prism and focus on light option

Possible spells to start off chapter 1

- LumenBridge?- A spell which allows the connection of different magical light sources, acting like cables to link points, it would need to be carried to a close point otherwise the power drops to zero, so distance based.
- Lost Echoes - Reveals points of interest/hidden sections or can be specific to items that have lost their purpose and can be returned to its previous owner which can tie to quests
- Rotara - A spell to allow the rotation of objects and can also be used to store the spin and allow for interesting movement mechanics
- SpacialFold? - The ability to bend light for a reflective surface without needing to adjust the angle of the object directly.
- Ampere - ability to power relics/objects using electricity or create chain of electric currents.
- - Freeze object

Snowpoint gym idea, when using a move spell, can move said object by one tile but when combine with freeze,allows inifnide distance push

FINAL SPELL LIST

- Ampere - ability to power relics/objects using electricity (generated by user) [essentially if within range of tile system radius,the spell will instantly power it on without need of animation]
- Glaciate - ability to freeze an object and allows the object to move in one direction an infinite distance.
- Vis - ability to move objects [ref - like strength in pokemon], which allow for movement by 1 tile in designated section
- Rotara/Redirect - rotate an object by 90 degrees per turn
- Lost Echoes - Reveals points of interest/hidden sections or can be specific to items that have lost their purpose and can be returned to its previous owner which can tie to quests
- Weave - ability to create cable/wire links between relics/objects where power drops the more distance between two points are.

Puzzles ideas

FINAL SPELL LIST

- Ampere - ability to power relics/objects using electricity (generated by user) [essentially if within range of tile system radius,the spell will instantly power it on without need of animation]
- Glaciate - ability to freeze an object and allows the object to move in one direction an infinite distance.
- Gravitate - ability to move objects [ref - like strength in pokemon], which allow for movement by 1 tile in designated section
- Rotara/Redirect - rotate an object by 90 degrees per turn
- Lost Echoes - Reveals points of interest/hidden sections or can be specific to items that have lost their purpose and can be returned to its previous owner which can tie to quests
- Weave - ability to create cable/wire links between relics/objects where power drops the more distance between two points are.

MAIN PUZZLES (FOR FRIENDS)

Serves as tutorial to teach using spells to solve puzzles, will be singular in nature most cases

1. Glaciate and Gravitate will be taught together - A two step puzzle, one will essentially be a classic move puzzle to move an object to the slot(gravitate) , the second will be a similar one except like the snow point gym, a sliding puzzle where glaciate will be used in conjunction with gravitate.
2. Ampere and Weave - A three step puzzle, one will be lighting a power source to progress, then weave to connect two power sources together and finally one where its a multipoint connect and the player has to power the initial source once the wires have been set up.
3. Lost Echoes and Rotara - A single step puzzle where using lost echoes will help the player find hidden items and a specific item will be embedded into an object which is out of reach and use of rotara will help it come into view to grab,

Story (Chapter 1)

Story:

- Cutscene
- Work your way through school (orientation day?)
- Meeting new characters (meet main cast at the dorm)
- Getting along with puzzles - not too heavy (simple and casual)
- Get to know where you classes are, what they are
- Very discover
- Insert name

MC story:

Story Flow

Flow of events

CUTSCENE

- Student is tired, on their way home from uni
- Phone is getting notifications about uni, part-time job blah blah blah
- They get frustrated
- They swerve onto random road in the middle of nowhere
- They do something to their phone and scream maybe
- Lean back against the car
- Looking into the stars
- Star gets bigger and brighter, falls onto you
- Screen fades with the light,linking to how Nick introduced the presentation
- BOOM LUMENFALL

Start of player control segment

The main character wakes up in a forest where the player can't see anything around them.

MC: "HUH–"
MC: "wow, i'm finally dead, aren't I?"
MC: "man these last few years were for nothing anyways. what was the point of studying PHYSICS JUST TO BE HIT BY ONE OF THE DAMN THINGS I STUDY"
MC: "ughhhh"
MC: "let me get up and look around then"
MC: "wait, what's that light over there?, clearly the gamer in me knows i should follow it"

however a part of the screen is light to indicate the direction the player can go towards, here is where the player will get the initial tutorial for movement i.e wasd and any other movement controls.

They then leave said forest to follow a path that leads to the academy gates.

when academy is in view

MC: “Why does heaven look like a school..? Oh no, I’m in hell aren’t I?”
MC: “Is this a check in system, I see people lining up at the gates”

walk towards gate where NPC guard is - possibly indicate with a marker

MC: “Hey, is this where the newly deceased check in for the afterlife or something? I’m kinda new here so not sure what’s going on”

Once they are there,they attempt to enter the academy gates and someone butts in and stops them from entering(security guard).

GUARD: “stop fooling around kid, i don’t have time for this, go to the back of the line like everyone else”

player needs to wait for line to reduce

GUARD: “NEXT! Admission letter please?”
MC: “Admission letter? I need an admission letter for being dead?”
MC: “*the heck is wrong with this place*”
GUARD: “Not this again. Either you show me your admission letter for Lumenfall Academy or GET OUT”
MC: “Lumenfall academy?”
GUARD: “If you don’t show me your letter in 5 seconds, the gates are going to close”
GUARD: “5..”
MC: “*Uhh oh no*”
GUARD: “4..”
MC: “*What do I do what do I do*”
GUARD: “3..”
MC: “*This seems like the only sign of human civilisation for a good while and I don’t wanna walk to find the next one*”
GUARD: “2..”
MC: *sweats nervously*
GUARD: “1..”
GUARD: “Okay that’s it. GUA-”

~ This would be nice to add a little cutscene/animation for but not necessary ~

Random student: “I’M HERE I’M HERE, PLEASE DON’T CLOSE THE GATES IT’S NOT CLOSING TIME YET”

random student trips and letter slips from their hand and is carried by the wind~

letter falls in MC’s hand

~ End cutscene ~

a letter conveniently falls into your hand which the wind carried after another student who came up behind you fell and their letter is now with the MC.

GUARD: “About time , H…. i cant’ read this, whats your name? (player enters their name for example factorio)… alright factorio,hurry up and get in, we’re closing the gates now”
ANNOUNCEMENT: “Announcement: The gates are now closing for this year’s entry into Lumenfall Academy. Can all students please head into the courtyard to begin orientation”

The guard mistakes it for yours and lets you in while, telling you to head straight ahead to the main hall where orientation is and once u enter, the other student will start crying and begging the guard to let them in,trying to explain what happened.

as player walks away, they should be able to hear the random student crying and begging

The player will gain control again and move to the indicated area where the orientation will take place(Courtyard, central location in map). Once they get there, they fall into the pack/someone will force them to?,then a text based dialogue cutscene will proceed where the Kepler(to be named) will introduce themselves and dialogue to be decided which essentially leads to the MC finding out this world is filled with magic.

After Kepler finishes, the player (regains control) will hear chatter from other students who say they are heading to dorms and with that follow suit, player will then move to said location and find a clerk who deals with dorm assignments and start a dialogue segment to get themselves a room. MC hears they will share with some others a room,however that the key (which is a phrase to open that door) was already dealt to the others and they have misplaced your copy, they indicate to the MC that the last person who picked up theirs went to a specific area(TBD) and suggest you head that way and ask them.

Potential Assets for temp use

Chibi witch character
https://sketchfab.com/3d-models/stylized-chibi-witch-818637c7c54548cb946846f98b81452d

Assets

TODO assets:

Characters - Mesh & ***Skeleton***
For player + 2 quest givers

Objects - Fauna
- Buildings
- Builiding Interiors for puzzles

Assets prototyped:

Scroll wheel for spells
Character inventory
Fonts - Custom general fonts
Menu settings

Assets ready:
Outdoor environments:
- Flowers
- Mushrooms
- Plants
- Rocks
- Rock roads
- Shrubs
- Trees

Indoor environments:
- Floor
- Door

Characters:
- 1 chibi witch character (moveable with animations) with different outfit

Quests

Four main friend quests

- By Stella (teaches ampere) - Stella has an hermione vibes such that she decided to read ahead of her course material and even started her assignment for Magical Engineering Smart Systems(MEMG1013)where she needs to recreate a simple relic from the world which stores electrical energy for later use and can transmit said power to other objects to create an electrical grid. She has trouble getting it to work as she can only rely on the little knowledge she has and the readings havent help. ADD dialogue here and have a joke bit where MC comes up with solution to fix and Stella realises you're right and gives you first crack to power it up to see if it works and cue learning Ampere. - First light(quest name?)
- By Stella (teaches weave) - Stella immediately then requests your help to finish her assignment revealing a small piece of herself where despite wanting to be an magical engineer ,her aptitude in electrical based magic suck ass, which proceeds to her asking you to wire these relics up magically, teaching u to weave - STRING EM TOGETHER
- By Cinna Cirra(teaches Vis) - CC had originally registered to be in the orientation and not realising its FOR helping in orientation which was meant for more veteran students (essentially no one checked credentials and he cannot back out,ask vi for joke bit). CC was assigned to align these objects(ask miki for what these are,he hasnt come up with it yet) and CC asks your help to move them as they have no clue how do it as they havent learnt the spell themselves.Then pans to the side to overhear a conversation(ask vi) where it teaches u the spell required and then proceed to puzzle - out of alignment
- By Cinna Cirra(teaches Glaciate) - Another orientation task to set up was assigned to CC and requests the MC help further since they helped previously. The next task involves setting off these traps off in a particular order but they want it to be fun and not boring and CC gets the brilliant idea to suggest making the ground iced to slide around on,however as CC doesnt know the spell, the MC gets the idea for the spell by getting a hint of casting while thinking cold thoughts. - Cold feet, warm idea
- By ORIO (teaches rotara)- Orio been trying to get this particular setup to work and it drives him nuts as his whole need for optimization drives him to not try anything unless its done perfectly.Orio starts explaining with alot of gaming analogies that the order of rotations matter and must be done on the right “turn”, during this conversation bit, he teaches u about the spell rotara and continues to contemplate this and the MC using the trial and error method starts the puzzle and solves it - Patch notes
- By Katrina (teaches lost echoes) - She has lost something meaningful (family thing maybe?) .Shes been searching and not told anyone as to her its “not a big deal”. She’s heard rumours (knows a guy from a guy) about a spell that reveals things lost or out of place but tried on her own to cast it but has failed thus far. Mc gets the know how to use lost echoes to reveal hidden points of interest, leading to finding the item. - Something borrowed

Side quests(skip)

- The classic fetch quest, involving using the find spell to locate smth
- The dorms electric grid has lost its power and requires the wires be set up again

Characters (Main Cast)

Main Cast

MC-

Orio (Nick) -
Character Description (appearance): canonically wears tropical summer outfits (:sob: -vi),canonically late to everything
Character Personality: WEEB, nerd but endearing, will talk your head off about this game called SPELLIO if you mention anything related to it, has a strange love for automation and optimisation?

Token white guy liking JP stuff kinda vibes
Outfit needs to be laid back/not serious. Expression should be relaxed. Flip flops are required.

Character Traits: Serious & reliable when the moment arises, clever, really good at using one spell
Character Backstory:
Character Flaws: Too laidback sometimes, full of himself a bit,
Character Development Arc:
Character Story Quest: Game related?

Lost his game console and he can't play spelling, makes him irritated

ORERERERERERERO

will suspiciously love a biscuit
Introduce open-world (explains parts of the world)
Spell to teach MC - Amphere

Stella (Vi) -

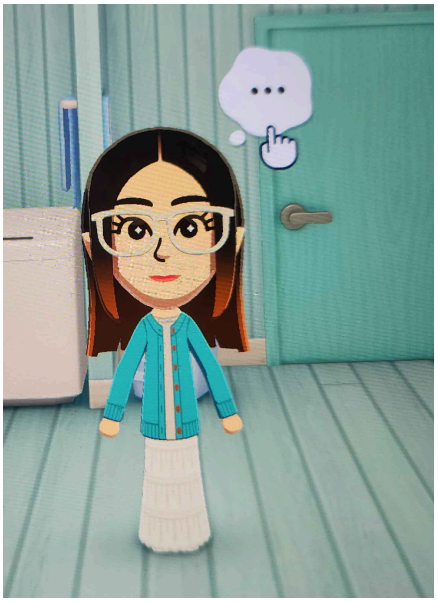
Character Description (appearance): Nerd but into fashion, stick to the rules, dictator (group leader),
Character Personality:
Character Traits: Silly, Whimsical, Stressed, Serious, Likes to get good mark, LOVES Plushies, Fashionable, Sleepy, ANXIETY, JARONA
Character Backstory: From a different city/place, still getting used to this city, wants to a magical engineer, has crush on cute short guy who shall not be named (yet) who is a year ahead. A little snobby, has controlling-ish parents, is learning to walk their own path with some good friends. Give this girl a break man.
Character Flaws: Headstrong, doesn't easily adapt to other peoples opinions,
Character Development Arc: Learns to let loose and accept peoples help
Character Story Quest:

Involves studies/fashion and has plush mention
Maybe take MC to get their uniform?
Introduces prism mechanic

Outfit does not need to be exact but it needs to be neat/fashionable. Combat boots are a must. Red bow is also a must. Glasses should be regular glasses not sunglasses.

Katarina (Jaz) -

Character Description (appearance): black/brown hair, average height, light skin tone,
Character Personality: Wants to be rich. Doesn't like studying all that much. Wants to marry this idol called Xiūbīn. Very crazy over this idol. Fan girl. Men are all trash unless they're that guy. Despite it all, she's a hard worker and does her best to make things work.
Character Traits: Crazy, Whimsical, Crazy, Also into fashion, a bit of gossip, crazy
Character Backstory: Not privileged. Family isn't the most understanding of her.
Character Flaws:
Character Development Arc:
Character Story Quest:



Long white skirt is necessary. White/blue sneakers. Glasses are optional. Top can be a tshirt and cardigan.

Cinna Cirra (Len) -

Character Description (appearance): Shoulder length wavy hair. Not tall. Slightly tan skin.
Character Personality: Very chill, loves the clouds and the sky. Trying to figure out who they are. Loves cute things and androgynous clothing. Kind, likes helping people out. Nervous.
Character Traits: Kind, Naive, A little coddled, book smart but not necessarily street smart (this is something they learn through the game!) sometimes, idealistic, rich
Character Backstory: Grew up well, nothing too tragic. But never really found a place where they belong. Always questioning who they are and who they're meant to be.
Character Flaws: Naive, doesn't understand what it's like on the other side of things where people don't grow up privileged.
Character Development Arc:
Character Story Quest:

Eyes do not need to be like this, they can be regular. Outfit does not need to be exact, but should be loose and chill. E.g. long loose pants and a tshirt + jacket.

Completing a rite of passage

Chapter 1:

- Intro/Orientation
- Try to find dorm
- Need key
- Goes to receptionist, they say they passed the key to X
- Key is in X's hand
- Story quest and then X says Y has it
- So on and so forth
- Eventually meets all dorm mates
- Dormmates get together to find MC to ask whether they have the key yet
- Meet at receptionist
- Ask again because none of them have it
- Receptionist is confused and hasn't seen any of them before
- Gives them key
- Group is confused and ponders on it but eventually is just tired and goes back to dorm
- MC goes to sleep (chapter 1 main questline ends with the MC waking up and the screen going bright similar to intro)

Open-world exploration and puzzles when not doing main quest
Small NPC interactions and quests?
We need some replayable content that resets/or is continuous?

- Minigame?
- Need to think

World locations

Player moveable areas

Forest - Big area, starting section (ORIO, u return here to meet)

- Basic forest

Courtyard - Big area, must have assembly area (CC)

- Castle surrounds courtyard
- Fountain in the centre
- Bushes and places to sit
- No other buildings

Main castle area (KATRINA)

- Contains a multitude of the same classroom (specifically for first years), has slight differences (low priority) (**Katrina**)
- Have magical thing in dorm that you stand on/stand in that will allow you to transport to classrooms. Cough cough teleport waypoint

If possible to do it in time (FOR ALL SIRIUS DORM STUDENTS)

- The dining room for all students
    - Hogwarts style of a few long tables
    - BENCHES
- BIG common area for students to hang out and interact
    - Counches,tables,chairs,some decorations etc, think gryffindor dorm area as an idea
- Library
- Spell practising area
- Just needs to look good enough and cosy

SIRIUS DORMITORY (Stella)

Common area for all students in their dorms in that wing of the academy. (**Stella**). Gryffindor vibes, just cozy.

Transition from the main dorm area to dorm will be speaking to a friend to lead you to the room.

Your Dorm room - small area,basically to have end of chapter scene

- Contains common shared room for the 5 students
- Access to MC room only in this chapter

FLOW of meeting friends

Stella -> CC -> ORIO -> KATRINA
